# Coal Short 50,000,000 Tons

There is a shortage of 50,000,000 tons of coal. Fire wood is needed in cities and towns to relieve suffering. Georgia farmers may materially help the situation by increasing the output of cordwood and placing it on the market---a patriotic privilege.

## Shortage May Continue

The coal shortage is expected to continue for the duration of the war. Every farmer should cut enough wood for home consumption and a surplus to sell to the cities. Cordwood is bringing attractive prices.

## Save the Valuable Wood

High grade logs bring the highest prices when cut into lumber. Top-wood and defective logs make good cordwood. On every farm there are many short-stemmed old trees that should be cut out. Write the State College of Agriculture for "Marketing Farm Woodland Products."

### What Is Your Duty as a Citizen Soldier in This Serious Situation?

### Let No Farm Wagon Go to Town Empty
